MAINTAIN A SAFE FRAME ENVIRONMENT

National Eye Care, Inc. manufactures Safe Frame eyeglasses that are uniquely designed for institutional settings. Ordinarily, eyeglasses have a sharp metal shank in each temple, which inmates have modified and used as weapons, lock picks and vandalism tools.

Safe Frame eyewear comes in a variety of styles and colors. Orders for Safe Frame are processed in our full service optical laboratory by our trained technicians.

SAFE FRAME

Institutional Safety

No Metal Shank

Decrease Risk

Serial # Etching
